paradise

Who am I?

- Batool Maali
- Accountant
- Graduated from University of Jordan
- My internship was in Diestream
- My role was Fullstack Engineer (Using laravel as framework)

Orange Bootcamp

Project Description:

This project includes everything related to wedding occasions.It is considered to be an intermediary between persons, related companies, shops and tourist offices. It is an integrated site that brings together everything related to those who are about to get married, all under one roof which helps them find everything they need without making any additional efforts, in record time and at low prices.

The services provided by this site include the ability to reserve wedding dresses / flowers / formal suits / halls / photographers through direct access to the providers of these services through this site, which guarantees them to obtain low prices if the reservation is made through the site, as well as It also provides offers that include integrated packages.

Main Goal:

The problem that faces the youth in preparing for weddings such as the time limit, a lot of choices and unclear information about the places is increasing day by day. From this point on, the idea of Wedding appears which is based on providing the essential wedding services in one place which reduces the time and effort for anyone who is about to get married.

This project includes everything related to wedding occasions. It is considered to be an intermediary between persons, related companies, shops and tourist offices. It is an integrated site that brings together everything related to those who are about to get married, all under one roof which helps them find everything they need without making any additional efforts, in record time and at low prices.

Used Technologies & Languages:

- HTML
- CSS
- JavaScript
- Bootstrap
- PHP
- Laravel
- MySQL
- GitHub
