1. INTRODUCTION

1.1 PURPOSE

The purpose of this document is to provide a detailed overview of the Wedding Website. It will explain the purpose and features of the website, the interfaces of the website, what the website will offer to the customers.

1.2 INTENDED AUDIENCE AND PERTINENT SECTIONS

This document is intended for any party that offers wedding services and products, anyone who wants to have a wedding, project managers, developers, testers, document writers, and project stakeholders.

1.3 PROJECT SCOPE

The scope of this project, is to provide wedding services including the ability to reserve wedding dresses / flowers / formal suits / halls / photographers through direct access to the providers of these services through this site, which guarantees them to obtain low prices if the reservation is made through the site, as well as It also provides offers that include integrated packages.

1.4 DOCUMENT CONVENTIONS

Bold-faced text has been used to emphasize section and subsection headings.

2. DESCRIPTION

2.1 PRODUCT PERSPECTIVE

The problem that faces the youth in preparing for weddings such as the time limit, a lot of choices and unclear information about the places is increasing day by day. From this point on, the idea of Wedding appears which is based on providing the essential wedding services in one place which reduces the time and effort for anyone who is about to get married.

This project includes everything related to wedding occasions. It is considered to be an intermediary between persons, related companies, shops and tourist offices. It is an integrated site that brings together everything related to those who are about to get married, all under one roof which helps them find everything they need without making any additional efforts, in record time and at low prices.

2.2 FEATURES

The **main** features of this project are:

- Users can log in/register to the site.
- Each user can reserve wedding dresses / flowers / formal suits / halls / photographers.
- Users can view their experiences on the site and others can provide their feedback.
- Admins have the access to manage all the registered users, in addition to manage all the services that the website offers.

2.3 OPERATING ENVIRONMENT

Operating environment for the Wedding Website is as listed below:

- Client/Server system.
- Operating system: any operating system can support this system as it is not particularly software or hardware dependent.
- Database: SQL database.
- Platform: JavaScript/PHP.

2.4 CONSTRAINTS: IMPLEMENTATION / DESIGN

Design and implementation constraints are listed below:

- The global schema.
- SQL commands for queries.
- Implementing the database at least using a centralized database management system.

2.5 USER DOCUMENTATION

Along with the software product, a user manual would be written to help people understand the working methodology and usage of the developed prototype system. It would be written for nontechnical individuals and the level of content or terminology would differ considerably from, for example, a System Administration Guide,

which is more detailed and complex. The user manual would follow common user documentation styles capturing purpose and scope of the product along with key system features and operations; step-by-step instructions for using the system.

3. SYSTEM FEATURES

- Users:

1. Users can log in/register to the site.
2. Each user has a special profile with all his/her information and he/she can update it.
3. Each user can reserve wedding dresses / flowers / formal suits / halls / photographers.
4. Users can choose any package and reserve it.
5. Users can view their experiences on the site and others can provide their feedback.
6. Through the “Contact Us”, users can send a private message to the site.
7. After requesting an order, the user will receive a confirmation message on his/her email.

- Admin Dashboard:

1. Manage admin: Admin can add admins name, email, password, image.
2. Manage user: admin can read & delete users.
3. Manage Photographers: admin can do CRUD operation for photographers, need to create name, email, mobile, address, availability & image.
4. Manage Shops: admin can manage both dress & flower stores (CRUD operations), must have name, email, phone, & address.
5. Manage Hall's Companies: admin can manage hall's companies (CRUD operations), must have name, email, phone, & address.
6. Manage Tourism offices: admin can manage tourism companies (CRUD operations), must have name, email, phone, & address.
7. Manage Dresses: admin can manage dresses (CRUD operations), each dress must have name, size, color, price, image, availability, & dress shop.
8. Manage Suit: admin can manage Suits (CRUD operations), each suit must have name, size, color, price, image, availability, & dress shop.
9. Manage Flowers: admin can manage flowers (CRUD operations), each flower must have a name, color, type, price, image, availability, & flower shop.
10. Manage Halls: admin can manage halls (CRUD operations), each hall must have a name, address, price, type (indoor, outdoor), number of people, availability, image, company name.
11. Manage Tourism destination: admin can manage tourism destination (CRUD operations), each tourism must have city name, price, max passengers, current passengers, availability, city image, & tourism offices.
12. Manage order: admin can read and sort orders.
13. Manage packages: admin can create and read and sort packages.
14. Manage Reports: Lists all halls companies, dresses & flowers shops, tourism offices, & photographers.
15. Manage community: admin can read & delete user's posts & comments.
16. Statistics.

4. REQUIREMENTS OF EXTERNAL INTERFACE

4.1 USER INTERFACES

The user interface for the website shall be compatible with any browser such as Internet Explorer, Mozilla or Netscape Navigator by which users can access the system.

4.2 Use Case Diagram

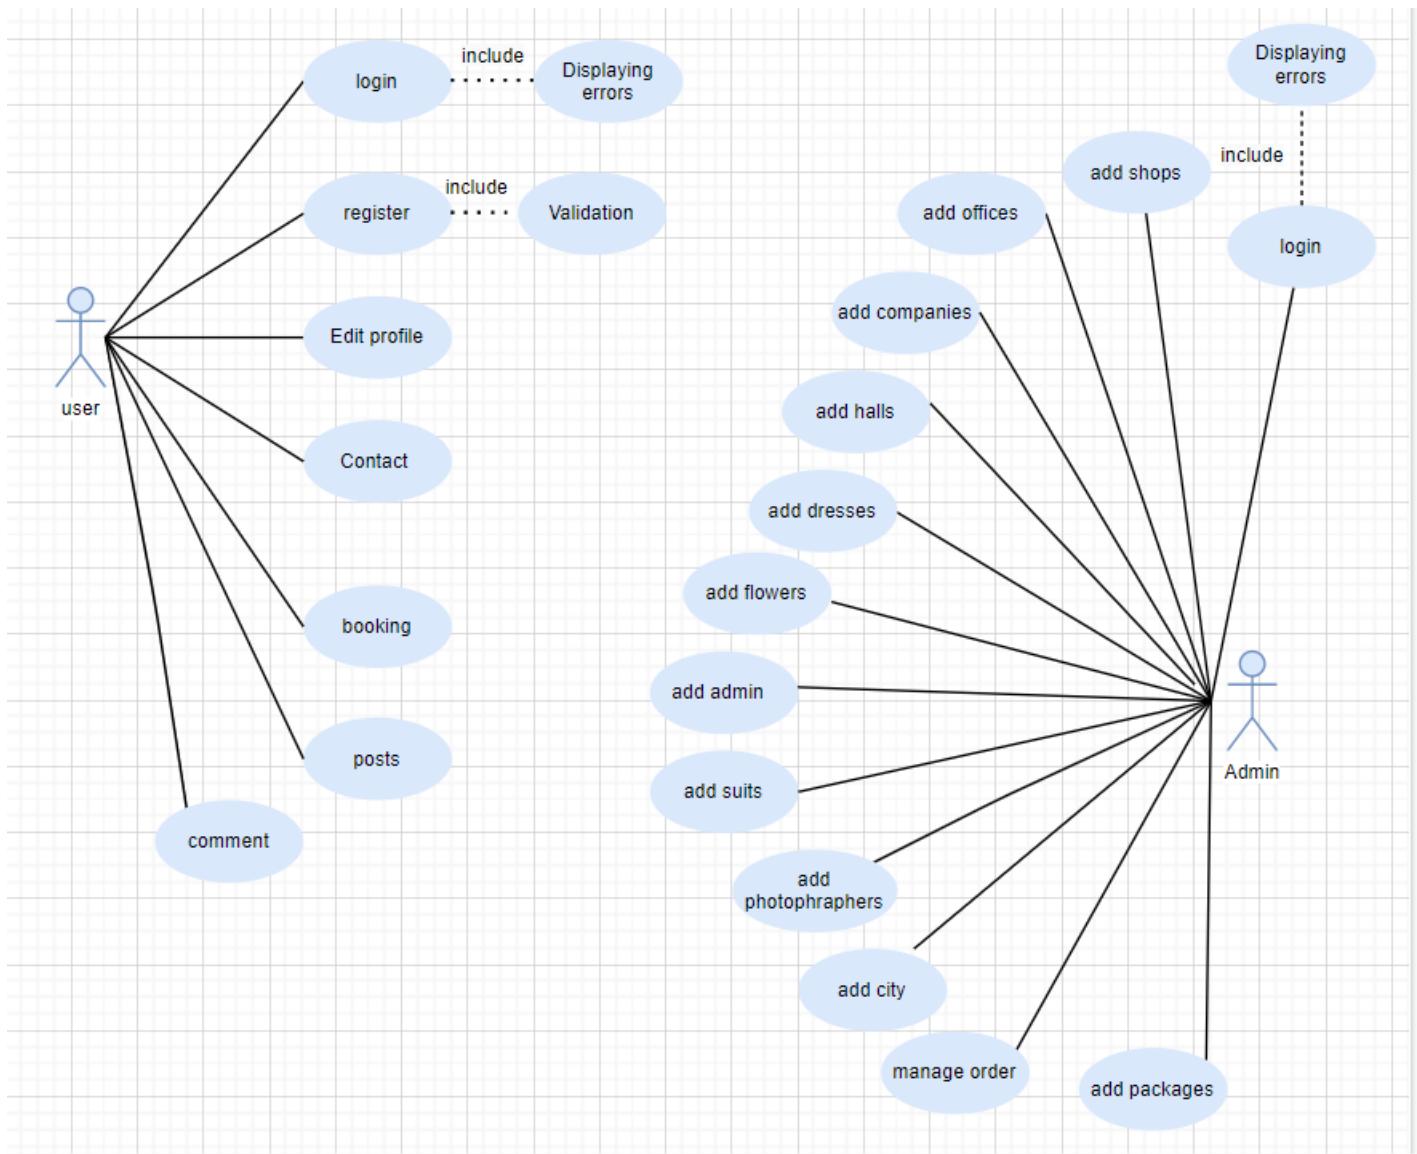

Figure 4.1: Use Case Diagram for Wedding Website.

4.3 Test Case

Figure 4.2: Test Case for Wedding Website.

4.4 Class Model

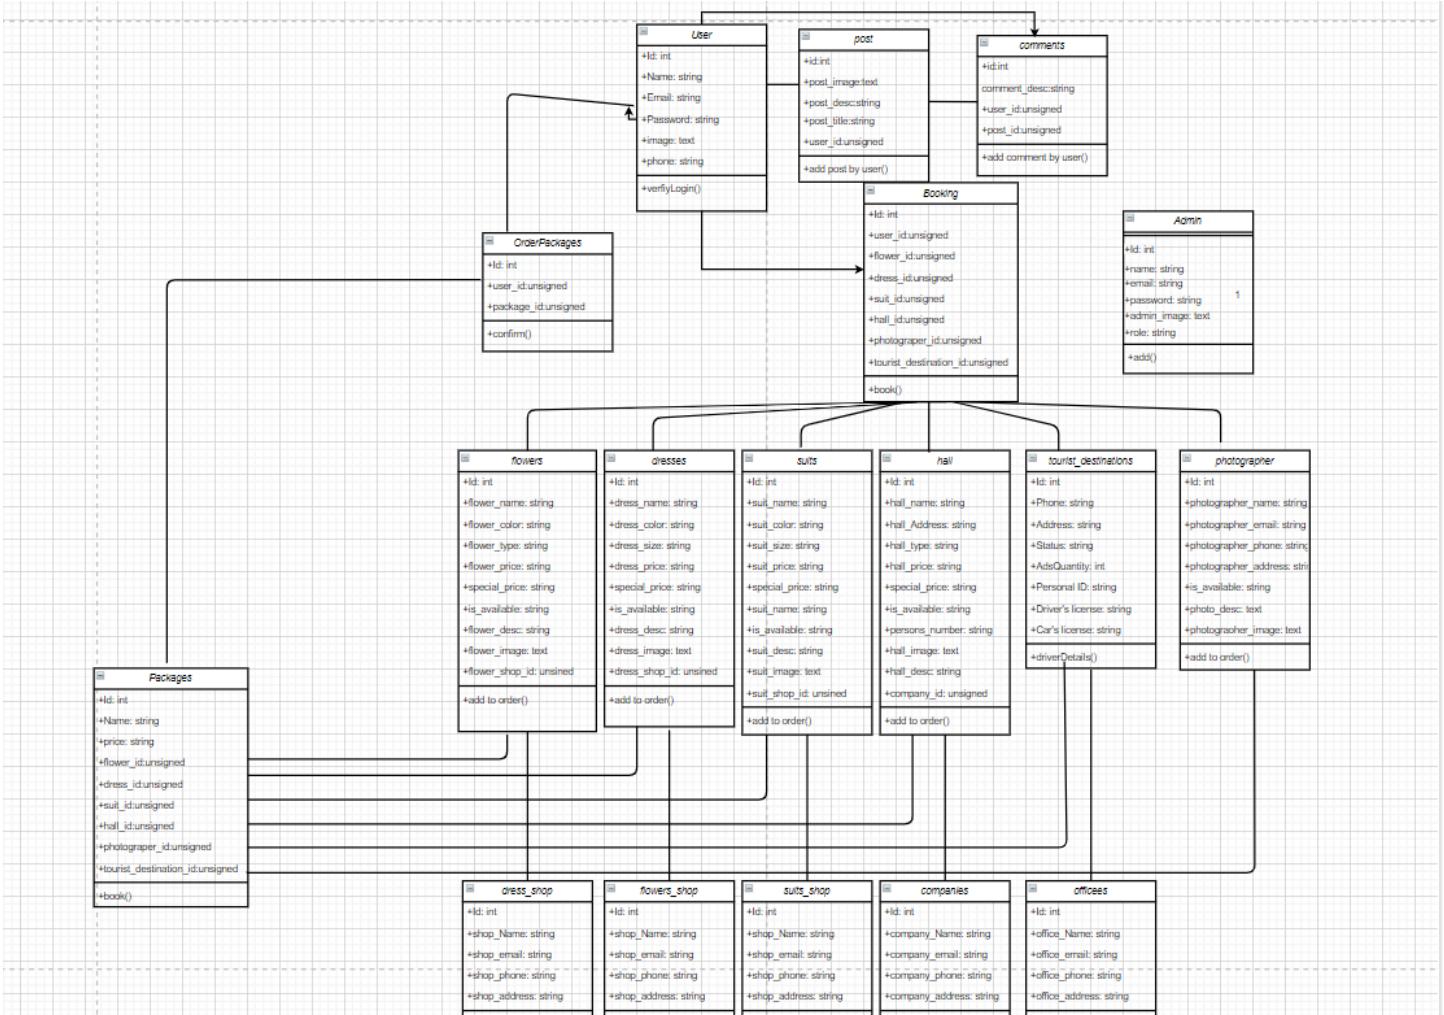

Figure 4.3: Class Model Diagram for Wedding Website.

4.5 Database Design

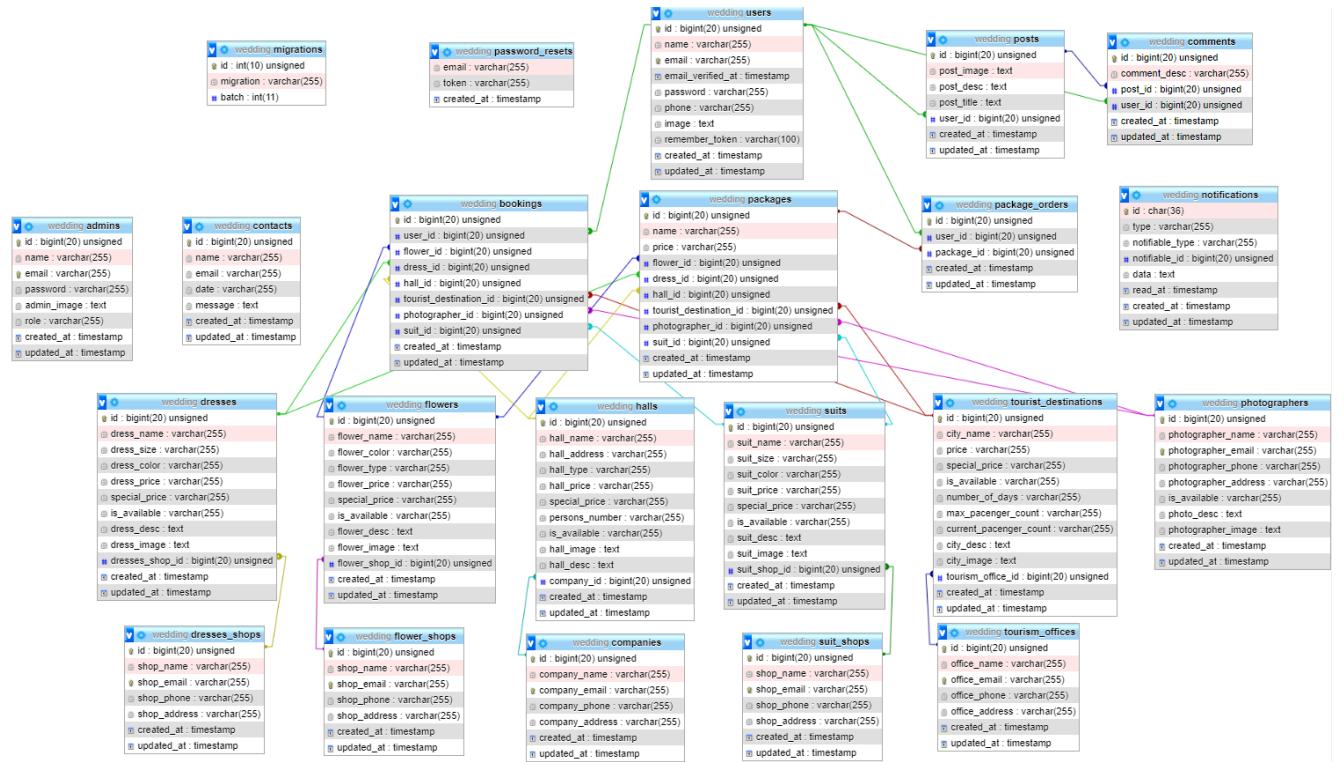

Figure 4.4: Database Design for Wedding Website.

4.6 HARDWARE INTERFACES

Since the website must run over the internet, all the hardware required to connect to the internet will be a hardware interface for the system.

4.7 SOFTWARE INTERFACES

The following are the tools and database that should be used for the development:

- HTML
- CSS
- JavaScript
- Bootstrap
- Laravel
- MySQL
- PHP
- Apache
- phpMyAdmin
- Axios

4.8 COMMUNICATION INTERFACES

The website shall use the HTTP protocol for communication over the internet and for the intranet communication will be through TCP/IP protocol suite. in addition to any web browser.

5. ADDITIONAL NONFUNCTIONAL REQUIREMENTS

5.1 PERFORMANCE

The system requires a fair amount of speed especially while browsing.

5.2 SAFETY

If there is extensive damage to a wide portion of the database due to catastrophic failure, such as a disk crash, the recovery method restores a past copy of the database that was backed up to archival storage (typically tape) and reconstructs a more current state by reapplying or redoing the operations of committed transactions from the backed-up log, up to the time of failure.

5.3 SECURITY

The main security concern is for users' account hence proper login mechanism should be used to avoid hacking. The online registration system shall not disclose personal information of users to unauthorized users or the public.

5.4 SOFTWARE QUALITY

- Speed and Latency requirements, the system is required a fair amount of speed.
- Reliability and Availability requirements.
- Robustness or Fault Tolerance Requirements.

6. APPENDICES

APPENDIX A: GLOSSARY OF TERMS

Table A.1: Glossary of Terms.

Term	Definition
Database	Collection of all the information monitored by this system.
Software Requirements Specification	A document that completely describes all of the functions of a proposed system and the constraints under which it must operate. For example, this document.
Stakeholder	Any person with an interest in the project who is not a developer.
User	Anyone who are about to get married
HTTP	Hypertext Transfer Protocol
TCP/IP	Transmission Control Protocol/Internet Protocol

Figure B.15: Add Dress.

The screenshot displays a wireframe of a web application interface. On the left, there is a vertical sidebar with a user profile icon and several menu items: dashboard, admin, logout, manage admin, manage customer, shop dresses, shop flower, photographers, manage order, halls, tourism offices, dresses, flowes, tourist destination, and admin. The main content area features a header with a logo and a search bar. Below the header, there are two tabs: "Add flower" (selected) and "Edit flower". The "Add flower" tab contains input fields for flower name, flower type, flower price, flower color, is_available (select yes/no), shop name, select shop, flower image, and image. A "submit" button is located at the bottom of this form. The "Edit flower" tab shows a table with columns: flower name, flower type, flower type, flower color, flower shop, edit, and delete. There are three rows of data in the table.

Figure B.17: Add Suit.

The screenshot shows a web-based administration interface. At the top, there is a header bar with a 'dashboard' button, a logo placeholder, a search input field with a magnifying glass icon, and a user profile picture with a close button.

The left side features a vertical sidebar menu with the following items:

- admin (selected)
- logout
- manage admin
- manage customer
- shop dresses
- shop flower
- photographers
- manage order
- manage packages
- tourism offices
- dresses
- flowes
- tourist destination
- admin
- hall
- company
- suit shop
- suit

The main content area is divided into two sections:

add admin (Top Panel):

- admin name: enter admin name
- admin email: enter admin email
- admin password: enter admin email
- admin role: dropdown menu showing 'admin/super admin'
- submit button

admin list (Bottom Panel):

name	email	role	edit	delete

Figure B.18: Admin.

The interface consists of several components:

- Header:** A dark purple bar with a white search bar containing a magnifying glass icon.
- Left Sidebar:** A vertical dark purple sidebar with a user profile icon at the top. Below it is a list of management functions, each with an icon and text:
 - admin
 - logout
 - manage admin
 - manage customer
 - shop dresses
 - shop flower
 - photographers
 - manage order
 - halls
 - tourism offices
 - dresses
 - flowes
 - tourist destination
 - manage company
- Add Company Form:** A large rectangular form titled "add company". It contains six input fields with labels:
 - company name
 - enter company name
 - company email
 - enter company email
 - company phone
 - enter company phone
 Below these is a "company address" label and another "enter company address" input field. At the bottom is a black "submit" button.
- Company Record Table:** A table with a dark purple header row containing columns for "company name", "company email", "company phone", "company address", "edit", and "delete". Below the header are three empty rows for data entry.

Figure B.19: Company.

The interface consists of the following components:

- Header:** dashboard, logo, Search, magnifying glass icon.
- Left Sidebar (Dark Theme):**
 - User icon with a blue outline.
 - Buttons: admin, logout.
 - List items with icons:
 - manage admin
 - manage customer
 - shop dresses
 - shop flower
 - photographers
 - manage order
 - halls
 - tourism offices
 - dressess
 - flowes
 - tourist destination
 - admin
- Main Content Area:**
 - Add shop dresses Form:** A large form with fields for shop name, enter shop name, shop email, enter shop email, shop phone, enter shop phone, shop address, and enter shop address. A submit button is at the bottom.
 - Shop Management Form:** A smaller form with fields for shop name, shop email, shop phone, and shop ADD. It also includes edit and delete buttons.

Figure B.20: Dress Shop.

The screenshot shows a web-based application interface. At the top, there is a header bar with a "dashboard" button, a logo placeholder, a search input field with a magnifying glass icon, and a user profile icon.

The left side features a vertical sidebar menu with the following items:

- admin
- logout
- manage admin
- manage customer
- shop dressess
- shop flower
- photographers
- manage order
- halls** (highlighted in blue)
- tourism offices
- dresses
- flowes
- tourist destination
- admin

The main content area contains two forms:

add shop flower

- shop name
- enter shop name
- shop email
- enter shop email
- shop phone
- enter shop phone
- shop address
- enter shop address
- submit**

shop name **shop email** **shop phone** **shop ADD** **edit** **delete**

Below these forms, there are three empty input fields for adding new shop information.

Figure B.22: Hall.

The dashboard sidebar on the left contains the following items:

- dashboard
- admin (with a user icon)
- logout
- manage admin
- manage customer
- shop dresses
- shop flower
- photographers
- manage order
- halls
- tourism offices
- dresses
- flowes
- tourist destination
- manage company

The main content area has a header with "Search" and a magnifying glass icon. It features a form titled "add office" with the following fields:

office name	enter office name
office email	enter office email
office phone	enter office phone
office address	enter office address

A large "submit" button is located at the bottom of the form.

Below the form is a table with columns for company name, email, phone, address, edit, and delete. The rows are currently empty.

company name	company email	company phone	company address	edit	delete

Figure B.23: Office.

The screenshot shows a web-based application interface. On the left side, there is a vertical sidebar with a dark background and white text. At the top of the sidebar is a user profile icon (a blue silhouette of a person wearing a headset) and two buttons: "admin" and "logout". Below these are 15 menu items, each consisting of an icon and text: "manage admin", "manage customer", "shop dressess", "shop flower", "photographers", "manage order", "manage packages", "tourism offices", "dressess", "flowes", "tourist destination", "hall", "company", "suit shop", and "suit". A small downward arrow is positioned between the "suit shop" and "suit" items. At the very bottom of the sidebar, there is a faint watermark-like text: "www.thesource.com.ng".

At the top of the main content area, there is a header bar with three sections: "dashboard" (in a white box), "logo" (in a white box), and "Search" (with a magnifying glass icon). The main content area has a dark header bar with the word "order" in white. Below this is a table with a black header row containing columns for "id", "name", "image", "price", and "delete". There are three empty rows below the header.

Figure B.24: Order.

The screenshot shows a web-based application interface. On the left, there is a dark sidebar menu with white text and icons. At the top of the sidebar is a 'dashboard' button. Below it is a user profile icon with a 'Logout' button next to it. The sidebar contains a vertical list of items, each with an icon and text: 'manage admin', 'manage customer', 'shop dresses', 'shop flower', 'photographers', 'manage order', 'manage packages', 'tourism offices', 'dressess', 'flowes', 'tourist destination', 'hall', 'company', 'suit shop', and 'suit'. A small downward arrow is positioned between the 'suit shop' and 'suit' items. At the top center of the main area is a 'logo' placeholder. To the right of the logo is a 'Search' input field with a magnifying glass icon. The main content area has a dark header bar with the word 'packages' in white. Below the header is a table with a black header row containing columns for 'id' (in red), 'package name', 'package price', 'package date', and 'delete'. There are three empty rows below the header.

id	package name	package price	package date	delete

Figure B.25: Packages.

The screenshot shows a mobile application interface. At the top, there is a navigation bar with a "dashboard" button, a "logo" placeholder, a "Search" field with a magnifying glass icon, and a close button (X). On the left side, there is a vertical sidebar menu with the following items:

- admin
- logout
- manage admin
- manage customer
- shop dresses
- shop flower
- photographers
- manage order
- halls
- tourism offices
- dresses
- flowes
- tourist destination
- manage company

The main content area has a title "add photographer". It contains several input fields and a "submit" button. The fields are labeled as follows:

- photographer name
- enter photographer name
- photographer email
- enter photographer email
- photographer phone
- enter photographer phone
- photographer address
- enter photographer address
- photographer image
- upload image
- is_available
- yes/no

Below the input fields is a "submit" button.

At the bottom, there is a table-like structure with columns for "photographer name", "photographer email", "photographer phone", "photographer address", "edit", and "delete". There are three rows of this table, each with empty input fields.

B-2. Mockup:

The screenshot shows a website for a wedding service. At the top, there is a navigation bar with links: Home, pages, post, about, packages, order, and login/register. Below the navigation is a large banner image of a woman in a white wedding dress standing on a balcony with columns. Underneath the banner is a red stylized flower logo. Below the logo is a quote: "YOU JUST ENJOY YOUR DAY! Lorem ipsum dolor sit amet, eu alia admodum volup tua cu hend, rerit tinci dunt nec cu, per an vidit tua cu hend Nec home delectus ne. Vim viven dum manda muste, an qui sagam accommo dare Lorem ipsum dolor sit amet, eu alia admodum volup tua cu hend, rerit tinci dunt Vim viven nec cu, per an vidit corpora, omemo dare. Eu alia admodum volup tua cu hend." A button labeled "button" is positioned below the quote. Further down, there is a section titled "DRESSES" with the same quote above it. Below this section are six smaller images of women in various styles of wedding dresses.

Figure B.43: Public Suit.

The screenshot shows a web-based administration interface. At the top right, there are icons for power and home. The main content area is titled "Add city". Below the title, there is a large input field labeled "Add city". To its right is a table with ten columns and two rows. The columns are labeled: id, name, max, current, price, days, image, edit, and delete. The first row contains empty cells. The second row also contains empty cells. On the left side of the screen, there is a sidebar menu with the following items:

- admin name
- MENU**
- manage Admin
- manage user
- shops
- photographers
- manage order
- manage packages
- halls
- tourism offices
- dresses
- Suits
- flower
- tourist destination
- manage company
- post
- reports
- Statistics
- Stock

Figure B.44: Add City.

The screenshot shows a dark-themed web application interface. At the top right, there are icons for power and home. The main title "Add company" is centered above a form. The sidebar on the left contains a user profile picture and a navigation menu with various administrative options. The main content area displays an "Add company" form with fields for company name, email, phone, and address, followed by a table of existing company records.

The main content area is titled "Add shop". It contains a form with four input fields: "shop name", "shop email", "shop phone", and "shop Address". Below the form is a table with the following columns: id, shop name, shop email, shop phone, shop Address, edit, and delete. The table currently has two empty rows.

id	shop name	shop email	shop phone	shop Address	edit	delete

Figure B.51: Add Shop.

The screenshot shows a user interface for managing suits. At the top right are icons for power and home. On the left is a sidebar with a logo at the top, followed by a user profile picture of a woman with long dark hair. Below the profile are several menu items under 'MENU': 'manage Admin', 'manage user', 'shops', 'photographers', 'manage order', 'manage packages', 'halls', 'tourism offices', 'dresses', 'Suits' (which is highlighted in blue), 'flower', 'tourist destination', 'manage company', 'post', 'reports', 'Statistics', and 'Stock'. The main content area is titled 'Add suit' and contains a form with fields for 'suit name', 'suits color', 'suits size', 'suit price', 'special price', 'suit desc', 'is available', 'suit image', and 'shop suit'. Below the form is a table with columns: id, name, size, color, price, image, edit, and delete. The table currently has two empty rows.

id	name	size	color	price	image	edit	delete

Figure B.52: Add Suit.

The image shows a mobile application's admin interface. On the left is a vertical navigation menu with a header featuring a logo of a green plant and the text "LIVELY". The menu includes:

- admin name**
- MENU**
 - manage Admin
 - manage user
 - shops
 - photographers
 - manage order
 - manage packages
 - halls
 - tourism offices
 - dresses
 - Suits
 - flower
 - tourist destination
 - manage company
 - post
 - reports
 - Statistics
 - Stock

On the right, there is a form titled "Add admin" with fields for Admin name, Admin email, Admin password, Admin phone, Admin image, and Admin role. Below the form is a table with columns: id, name, email, phone, image, edit, and delete.

id	name	email	phone	image	edit	delete

Figure B.53: Admin.

The screenshot shows a web-based administrative interface. At the top left is a logo featuring a green wreath. At the top right are two icons: a power symbol and a house symbol. On the left side, there is a sidebar with a user profile picture of a woman with long dark hair. Below the profile picture, the text "admin name" is displayed. A "MENU" section follows, containing the following items:

- manage Admin
- manage user
- shops
- photographers
- manage order
- manage packages
- halls
- tourism offices
- dresses
- Suits
- flower
- tourist destination
- manage company
- post
- reports
- Statistics
- Stock

On the right side, the main content area is titled "order table". It features a table with five columns: "id", "item name", "item image", "tem price", and "delete". The table has 10 rows, but all cells are currently empty.

Figure B.54: Order.
